

## BreadTh

onlinecv@waitnostartover.com | Portfolio: <https://files.waitnostartover.com/portfolio>

### Professional Summary

Software engineer with 9 years professional C#/dotnet experience, specializing in backend development and application longevity. Focus on resilience architecture, fault orchestration and recovery. Azure-experienced. Seeking a senior software developer or hands-on software architect role.

### Technical Skills

- Languages: C#, Bash, SQL, KQL, JavaScript.
- Frameworks: .NET, ASP.NET, Entity Framework, Blazor, XUnit
- Tools: Git, Docker, Visio, Mermaid, Azure DevOps Pipelines, JMeter, Claude Code (optional)
- Databases: CosmosDB, PostgreSQL, Application Insights/ElasticSearch, Service Bus/RabbitMQ

### Software Architect, Software Engineer | [SME SaaS company] | 2019-2026

Tech stack: Azure, Linux, C#/dotnet, ASP.NET

- Designed, built and maintained external HTTP APIs and internal services like billing workflows.
- Created and ran full managed client-facing services over unstable self-hosted third-party software.
- Established fault management infrastructure and fault-handling patterns.
- Migrated projects from self-hosted VMs to cloud-native solutions.
- Guided technical direction and advocated for sustainable engineering practices.
- Trained and mentored junior developers.

**Career break** | 2014-2019 sabbatical + independent software study and development

### Programmer | [SaaS Startup] | 2013-2014

Tech stack: C#/dotnet, ASP.NET

- Developed greenfield start-up project.

### Solutions Analyst | [Global data-analytics company] | 2010-2013

- Self-taught an undocumented proprietary programming language to automate core workflows.
